

## Values led

# OUR GEOGRAPHY

## VISA

We expose the children to a range of countries, developing respect for different cultures. The value of kindness is reflected in our children learning to care for the world and optimism is developed through their positive contributions to the future of the planet instilling an eco-friendly mind-set in all pupils from an early age.

## Inclusive

All children access our high-quality geography curriculum through interactive and engaging enquiry-led lessons. Children are provided with the knowledge and skills to explore and deepen their understanding of key geographical concepts. Geographical thinking is developed in all pupils through a range of activities.

## Systematic

Carefully planning and sequencing ensures every unit builds upon the substantive knowledge acquired previously. We ensure that all learners are given ample opportunity to apply their geography skills to deepen their knowledge and understanding, making connections between concepts and topics.

## Aspirational

Our curriculum gives children a deeper sense of their place in the world and a greater appreciation of environmental and social issues. Year on year, pupils at Stanburn become more confident in their understanding of the world around them and how they can contribute towards making it more sustainable.
