Skills Progression: Mathematics

EYFS
Mathematics   **In EYFS pupils are assessed against two Early Learning Goals (ELG) for Maths. These are in:** *Number* **and** *Numerical Patterns.*   *Developing a strong grounding in number is essential so that all children develop the necessary building blocks to excel mathematically. Children should be able to count confidently, develop a deep understanding of the numbers to 10, the relationships between them and the patterns within those numbers. By providing frequent and varied opportunities to build and apply this understanding - such as using manipulatives, including small pebbles and tens frames for organising counting - children will develop a secure base of knowledge and vocabulary from which mastery of mathematics is built. In addition, it is important that the curriculum includes rich opportunities for children to develop their spatial reasoning skills across all areas of mathematics including shape, space and measures. It is important that children develop positive attitudes and interests in mathematics, look for patterns and relationships, spot connections, 'have a go', talk to adults and peers about what they notice and not be afraid to make mistakes.*   **pg 10. EYFS Statutory Framework**   **January 2024**   **Children at the expected level of development will:**   *Number:*   • Have a deep understanding of number to 10, including the composition of each number;   • Subitise (recognise quantities without counting) up to 5;   • Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts   *Numerical Patterns:*   • Verbally count beyond 20, recognising the pattern of the counting system;   • Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity; 27   • Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.

Skills	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Knowledge: *(National Curriculum Coverage – Statutory Requirements)* **Number and Place Value**	*Number and Place Value:* *Pupils should be taught to:* - count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number - count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens - given a number, identify one more and one less - identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least - read and write numbers from 1 to	*Number and Place Value:* *Pupils should be taught to:* - count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward - recognise the place value of each digit in a two-digit number (tens, ones) - identify, represent and estimate numbers using different representations, including the number line - compare and order numbers from 0 up to 100; use and = signs - read and write numbers to at least 100 in numerals and in words - use place value and number facts to solve problems.	*Number and Place Value:* *Pupils should be taught to:* - count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number - recognise the place value of each digit in a three-digit number (hundreds, tens, ones) - compare and order numbers up to 1000 - identify, represent and estimate numbers using different representations - read and write numbers up to 1000 in numerals and in words - solve number problems and practical problems involving these ideas.	*Number and Place Value:* *Pupils should be taught to:* - count in multiples of 6, 7, 9, 25 and 1000 - find 1000 more or less than a given number - count backwards through zero to include negative numbers - recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) - order and compare numbers beyond 1000 - identify, represent and estimate numbers using different representations - round any number to the nearest 10, 100 or 1000 - solve number and practical problems	*Number and Place Value:* *Pupils should be taught to:* - read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit - count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 - interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero - round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000 - solve number problems and practical problems that involve all of the above	*Number and Place Value:* *Pupils should be taught to:* - read, write, order and compare numbers up to 10 000 000 and determine the value of each digit - round any whole number to a required degree of accuracy - use negative numbers in context, and calculate intervals across zero - solve number and practical problems that involve all of the above.

Skills	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	20 in numerals and words.			*that involve all of the above and with increasingly large positive numbers* - *read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.*	- *read Roman numerals to 1000 (M) and recognise years written in Roman numerals.*	
Number and Place Value	- Identify and represent numbers using objects and pictorial representations including the number line, and use the language of; equal to, more than, less than (fewer) most, least. - Read and write numbers from 1-20 in numerals and words. - Count to and across 100, forwards and backwards,	- Identify, represent and estimate numbers. - Compare and order numbers from 0 to 100. Use < > symbols and = sign - Read and write numbers to 100 in numerals and words. - Count in steps of 2,3,and 5 from 0 and in tens from any number, forward and backward. - Recognising place value of 2 digit numbers.	- Identify, represent and estimate numbers using different representations. - Read and write numbers up to 1000 in numerals in words. Recognise place value of 3 digit numbers. - Compare and order numbers up to 1000. - Count from 0 in multiples of 4,8,50 and 100. Find 10 or 100 more or less than a given number.	- Identify, represent and estimate numbers using different representations. - Round any number to the nearest 10, 100, 1000. - Count in multiples of 6,7,9, 25 and 1000. - Find 1000 more or less than a given number. - Recognise the place value of each digit in a four-digit number. - Order and compare numbers	- Read, write, order and compare numbers to at least 1,000 000 and determine the value of each digit. - Round any number up to 1,000,000 to the nearest 10, 100, 1000, 10,000 and 100, 000. - Count forwards or backwards in steps of powers of 10 for any given number up to 1,000,000. - Interpret negative numbers in context, count	- Read, write, order and compare numbers up to 10,000,000 and determine the value of each digit. - Round any whole number to a required degree of accuracy. - Use negative numbers in context, and calculate intervals across zero. - Solve number and practical problems that involve all of the above.

Skills	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	beginning with 0 or 1, or from any given number. - Count, read and write numbers to 100 in numerals. Count in multiples of 10. - Given a number, identify one more and one less. - Count in multiples of 2s and 5s.	- Use place value and number facts to solve problems.	- Solve place value problems using one, tens and hundreds.	beyond 1000. - Read Roman numerals to 100 and know that over time the numeral system changed to include the concept of zero and place value. - Add and subtract with up to 4 digit using the columnar method. Count backwards through zero to include negative numbers. - Solve number and practical problems which involve rounding numbers and place value.	forwards and backwards with positive and negative whole numbers, including through zero. - Solve number problems and practical problems that involve all of the above. - Read Roman numerals to 1000 (M) and recognise years written in Roman numerals.	
Key Vocabulary: **Number and Place Value** *This section identifies key vocabulary which should be introduced and explicitly taught in each year group. Language should be revisited year on year, retrieved regularly and*	• *Sort* • *Represent* • *Multiples* • *Partitioning* • *Ones* • *Tens*	• *Count in steps* • *Count in multiples* • *Place value* • *Estimate* • *Compare*	• *Ascending* • *Descending* • *10 or 100 more* • *10 or 100 less* • *Hundreds*	• *Negative numbers* • *Roman numerals* • *1000 more* • *1000 less* • *Thousands* • *Round*	• *Ten thousands* • *One hundred thousand* • *Powers of* • *Integer*	• *Millions* • *Ten millions*

Skills	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
pupils understanding of these key words should be checked often.						
Knowledge: *(National Curriculum Coverage – Statutory Requirements)* **Addition and Subtraction**	*Addition and Subtraction:* *Pupils should be taught to:* - *read, write and interpret mathematical statements involving addition (+), subtraction, (–) and equals (=) signs* - *represent and use number bonds and related subtraction facts within 20* - *add and subtract one-digit and two-digit numbers to 20, including zero* - *solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems*	*Addition and Subtraction:* *Pupils should be taught to:* - *solve problems with addition and subtraction:* - *using concrete objects and pictorial representations, including those involving numbers, quantities and measures* - *applying their increasing knowledge of mental and written methods* - *recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100* - *add and subtract numbers using concrete objects,*	*Addition and Subtraction:* *Pupils should be taught to:* - *add and subtract numbers mentally, including: a three-digit number and ones; a three-digit number and ten; a three-digit number and hundreds* - *add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction* - *estimate the answer to a calculation and use inverse operations to check answers* - *solve problems, including missing number problems, using number*	*Addition and Subtraction:* *Pupils should be taught to:* - *add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate* - *estimate and use inverse operations to check answers to a calculation* - *solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.*	*Addition and Subtraction:* *Pupils should be taught to:* - *add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)* - *add and subtract numbers mentally with increasingly large numbers* - *use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy* - *solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why*	*Addition, Subtraction, Multiplication and Division:* *Pupils should be taught to:* - *perform mental calculations, including with mixed operations and large numbers* - *use their knowledge of the order of operations to carry out calculations involving the four operations* - *solve problems involving addition, subtraction, multiplication and division* - *use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of*

Skills	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	such as 7 = − 9.	*pictorial representations, and mentally, including: a two-digit number and ones; a two-digit number and tens; two two-digit numbers; adding three one-digit numbers* - *show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot* - *recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.*	*facts, place value, and more complex addition and subtraction.*			*accuracy.*
Addition and Subtraction	- Read, write and interpret mathematical statements involving +, -, = signs.	- Add and subtract numbers using concrete objects, pictorial representations and mentally	- Add and subtract numbers mentally including - 3 digit numbers and ones - 3 digit numbers	- Add and subtract numbers with up to 4 digits using the formal written method of columnar addition	- Add and subtract whole numbers with more than 4 digits, including using columnar written methods.	- Solves addition and subtraction multi-step problems in context - Perform mental

Skills	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	- Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations. - Represent and use number bonds and related subtraction facts to 20. - Solve missing number problems.	including - a 2-digit number and ones - 2-digit number and tens - two 2-digit numbers - adding three one digit numbers - Solve problems with addition and subtraction: - Using concrete and pictorial representations, including those involving numbers, quantities and measures - Solves problems with addition and subtraction applying their increasing knowledge of mental and written methods - Recall and use addition facts to 20. Use related facts to 100. - Recognise & use inverse.	and tens - 3 digit numbers and hundreds - Add and subtract numbers with up to 3 digit numbers using column methods. - Solve problems including missing numbers using number facts. - Estimate the answer to a calculation and use inverse methods to check answers.	and subtraction where appropriate - Solve addition and subtraction two step problems in contexts, deciding which operations and methods to use and why. - Estimate and use inverse operations to check answers to calculations.	- Add and subtract numbers mentally with an increasingly large numbers - Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why including understanding the meaning of the equals sign - Uses rounding to check answers to calculations and determines, in the context of a problem, levels of accuracy	calculation, including mixed operations and large numbers. - Use knowledge of the order of operations to carry out calculations involving the 4 operations. - Solve + and – multi-step problems in contexts, deciding which operations and methods to use and why. - Use estimation to check answers and determine an appropriate degree of accuracy.
